

Dear Valued Customers,

UJYO BUSSAN CO., LTD.

We hope this message finds you well.

Thank you very much for your continued patronage and support of our products.

We would like to inform you that, regarding **UJ Core #50 / 5000m**, which you have favored for many years, we will be making the following changes to the **order conditions and yarn blend ratio**, effective once the current inventory is depleted.

### **Details of the Changes**

#### **1. Change in Order Lot Size**

Once the current stock has been exhausted, due to various circumstances, this product will be manufactured and accepted on a **made-to-order basis with a minimum order quantity of 90 cones**.

#### **2. Change in Yarn Blend Ratio**

Current: Cotton 44% / Polyester 56%

Revised: Cotton 30% / Polyester 70%

This change will take effect after the current inventory has been fully used.

#### **3. Product Quality**

The cotton used will remain the same **100% Supima cotton** as in the current product.

There will be **little to no difference** in yarn thickness or color fastness after processing compared to the current specification.

#### **4. Important Notes for Garment Dyeing (C/#L-500)**

As the revised product contains a lower cotton ratio, when used for garment dyeing, **color variation or uneven dyeing may occur** compared to the current product. We kindly ask for your understanding and careful consideration when using this product for such applications.

We sincerely apologize for any inconvenience this may cause and greatly appreciate your understanding.

We look forward to your continued support and patronage of our products.

Sincerely,

January 2026

UJYO BUSSAN CO., LTD.
